ACADEMIC PROGRAMS

Graduate Degree Programs and General Requirements
The university's Armour College of Engineering, Chicago-Kent College of Law, College of Architecture, College of Computing, Institute of Design, Lewis College of Science and Letters, and Stuart School of Business award graduate degrees. In many fields, students in master's programs may choose either a thesis track or non-thesis track program. These academic units also work together to offer a wide variety of joint- and dual-degree programs.

Doctoral Degrees
Applied Mathematics
Architecture
Architectural Engineering
Biology
Biomedical Engineering
Chemical Engineering
Chemistry
Civil Engineering
Computer Engineering
Computer Science
Design
Electrical Engineering
Environmental Engineering
Food Science and Nutrition
Management Science
Materials Science and Engineering
Mechanical and Aerospace Engineering
Molecular Biochemistry and Biophysics
Physics
Psychology
Rehabilitation Counseling Education
Technology and Humanities

Chemical Engineering
Chemistry
Civil Engineering
Computational Decision Sciences and Operations Research
Computer Engineering
Computer Engineering/Electrical Engineering (dual degree)
Computer Science
Electrical Engineering
Environmental Engineering
Environmental Management and Sustainability
Finance
Food Process Engineering
Food Safety and Technology
Industrial-Organizational Psychology
Information Technology and Management
Management Science
Manufacturing Engineering
Marketing Analytics
Materials Science and Engineering
Mechanical and Aerospace Engineering
Medical Devices and Biomaterials
Molecular Biochemistry and Biophysics
Physics
Psychology
Rehabilitation and Mental Health Counseling
Technical Communication and Information Architecture
Technology and Humanities

Law Degrees
Doctor of the Science of Law (J.S.D.)
Juris Doctor (J.D.)
Master of Laws (LL.M.)
J.D./LL.M. in Family Law
J.D./LL.M. in Financial Services Law (joint degree)
J.D./LL.M. in Taxation (joint degree)
J.D./M.B.A. (joint degree)
J.D./M.P.A. (joint degree)
J.D./M.S. in Environmental Management and Sustainability (joint degree)
J.D./M.S. in Finance (joint degree)
J.D./Master of Public Health (joint degree in cooperation with University of Illinois at Chicago)

Master of Science Degrees
Analytical Chemistry
Applied Cybersecurity and Digital Forensics
Applied Mathematics
Applied Physics
Architectural Engineering
Architecture
Autonomous Systems and Robotics
Biology
Biology for the Health Professions
Biomedical Data Science and Modeling
Biomedical Engineering
Academic Programs

Professional Master’s Degrees
These programs are specifically designed with the needs of professionals in mind. Most are course-only and do not require a thesis. In addition, the GRE requirement may be waived for applicants to professional master’s degree programs who hold a bachelor’s degree from an accredited U.S. institution with a cumulative GPA of at least 3.0/4.0.

Advanced Manufacturing (M.E.)
Applied Mathematics
Architecture
Architecture/Landscape Architecture (dual degree)
Architectural Engineering (M.E.)
Artificial Intelligence
Artificial Intelligence for Computer Vision and Control (M.E.)
Biological Engineering
Biomedical Engineering (M.E.)
Biomedical Imaging and Signals
Business Administration (M.B.A.)
Business Administration/Design (dual degree)
Business Administration/M.S. in Environmental Management and Sustainability (dual degree)
Business Administration/M.S. in Finance (dual degree)
Business Administration/M.S. in Marketing Analytics (dual degree)
Business Administration/Public Administration (dual degree)
Chemical Engineering
Computational Engineering
Computer Engineering in Internet of Things
Computer Science
Construction Engineering and Management (M.E.)
Cyber Forensics and Security
Cyber Security Engineering
Cybersecurity
Data Science
Design
Design Methods
Design/Public Administration (dual degree)
Electrical and Computer Engineering
Electricity Markets

Energy Systems (M.E.)
Engineering Management
Environmental Engineering (M.E.)
Food Process Engineering
Food Safety and Technology
Geotechnical Engineering (M.E.)
Health Physics
High Performance Buildings
Industrial Technology and Operations
Information Technology and Management
Intellectual Property Management and Markets
Landscape Architecture
Manufacturing Engineering (M.E.)
Materials Chemistry
Materials Science and Engineering (M.E.)
Mathematical Finance
Mechanical and Aerospace Engineering (M.E.)
Network Engineering
Pharmaceutical Engineering
Power Engineering
Public Administration (M.P.A.)
Public Works (M.P.W.)
Structural Engineering (M.E.)
Taxation
Technological Entrepreneurship
Telecommunications and Software Engineering
Transportation Engineering (M.E.)
Urban Systems Engineering (M.E.)
VLSI and Microelectronics
Wireless Communications and Computer Networks
### Accelerated Master's Program (AMP)

There are four paths to the completion of an accelerated master’s degree at Illinois Tech:

1. Co-terminal paired bachelor’s and master’s programs completed concurrently (see more information in the Co-Terminal Degree Programs section (p. 3))
   a. These programs have been pre-selected for pairing between the same academic discipline of undergraduate study or a different discipline.
   b. Graduate co-terminal admission is required when a student reaches a minimum of 60 earned or in-progress credit hours (see more information in the Synopsis of Co-Terminal Studies section).
   c. The student must submit a declaration of shared and non-shared courses (explicitly for graduate use) in the first semester of co-terminal enrollment.

2. Co-terminal unpaired bachelor’s and master’s programs completed concurrently
   a. These programs are not a pre-selected pair.
   b. The student must have advance approval from both the undergraduate and graduate academic units for the program of interest, including the intended shared courses.
      i. The approval process is called a Declaration of Intent and may be filed after the first semester of undergraduate enrollment.
      ii. Selected shared courses must explicitly satisfy the approved graduate curriculum without course substitution.
   c. Subsequent admission to the master’s program of interest is required.
   d. The student must submit a declaration of shared and non-shared courses (explicitly for graduate use) in the first semester of co-terminal enrollment.

3. Post-baccalaureate master’s program (Illinois Tech alums only)
   a. A master’s program that has explicit course requirements, of which the student has fulfilled some shared courses during the completion of an Illinois Tech bachelor’s degree.
   b. The bachelors will be earned no earlier than three years prior to the first term of master’s enrollment.
      i. Up to nine credit hours of relevant coursework may be shared between the two degrees.
      ii. Consideration of course substitution is at the discretion of the graduate academic unit.

4. Dual degree program with an Illinois Tech partner institution
   a. Two concurrent master’s degree programs, with prior agreement for specific programs between Illinois Tech and a selected partner institution.
   b. The number of applicable shared credits is determined by the terms of the partnership agreement, but may not exceed nine credit hours. In most cases six credit hours are allowed.
   c. Consideration of course substitution is at the discretion of the graduate academic unit.

### Co-Terminal Degree Programs

Co-terminal degrees provide an opportunity for students to gain greater knowledge in specialized areas while completing a smaller number of credit hours with increased scheduling flexibility than the completion of two degrees separately. Because most co-terminal degrees allow students to share course credit (a maximum of nine credit hours), students may complete both a bachelor’s and master’s degree in as few as five years. Up to a combined total of nine applicable credit hours earned prior to matriculation into an Illinois Institute of Technology graduate degree program, subject to the graduate studies rules and restrictions, may be considered for 1) external transfer credit for graduate transfer credit use; 2) internal transfer credit from an Illinois Institute of Technology undergraduate program; and/or 3) shared co-terminal program credit. More information regarding this policy is available in the Transfer Credit section of the Graduate Bulletin.

All co-terminal degree requirements must be completed within six years of undergraduate matriculation, or the student will be dismissed from the co-terminal degree program. A student who is placed on undergraduate academic probation may be dismissed from the co-terminal program pending review.

Co-terminal students maintain their undergraduate student status while completing graduate coursework, and can maintain financial aid eligibility when applicable.

The following are legacy co-terminal degree pairings as of June 2020. Students may also work with advisers to identify alternate bachelor’s and master’s degree pairings, pending the approval of the prospective graduate program and the student’s undergraduate program. More information is available in the Co-Terminal Advising section of this bulletin.

#### Applied Mathematics
- Bachelor of Science in Applied Mathematics/Master of Science in Applied Mathematics
- Bachelor of Science in Applied Mathematics/Master of Data Science
- Bachelor of Science in Applied Mathematics/Master of Mathematical Finance

#### Architecture
- Bachelor of Science in Computer Science/Master of Science in Applied Mathematics
- Bachelor of Architecture/Master of Science in Architecture

Bachelor of Science in Mechanical Engineering/Master of Engineering in Mechanical and Aerospace Engineering

Physics
Bachelor of Science in Physics/Master of Health Physics
Bachelor of Science in Physics/Master of Science in Physics
Graduate Certificate Programs

Designed to provide knowledge in a specialized area within an academic discipline, these programs typically consist of 9-12 credit hours of coursework that might otherwise be applicable to a master's degree. Students who successfully complete graduate certificate programs and who subsequently apply for admission and are admitted to a master's degree program at the university may apply all approved coursework taken in the certificate program and passed with a grade of “B” or better toward the master's degree. Admission to a certificate program does not guarantee future admission to a degree program.

With a few exceptions, Illinois Institute of Technology's graduate certificate programs are eligible for the Gainful Employment Programs. For a complete list of eligible certificates, see iit.edu/grad_adm.

Chemical and Biological Engineering
