

MASTER OF BUSINESS ADMINISTRATION (M.B.A.)

The Master of Business Administration requires the successful completion of at least 36 semester credits (12 courses). Part-time students enroll in two courses per semester (and over the summers) to complete the program in two years. The program schedule allows flexibility to students who wish to accelerate their studies. For example, full-time students may graduate in roughly one year by taking more courses each semester and attending school during the summers—but this requires careful planning.
